

Asunción Peña

Software Developer | Full Stack Developer

San José | (506) 89637029 | asuncion.pena.de@gmail.com | [Portfolio](#)

Full Stack Software Developer with experience building web applications using JavaScript, React, Laravel, and MySQL, including developing and integrating RESTful APIs to enable communication between frontend and backend systems and support data-driven applications. Familiar with UX/UI design principles to create user-focused interfaces, as well as cloud-based environments and Linux servers, including basic deployment and infrastructure management in Amazon Web Services. Passionate about technology and continuous learning, with strong interests in cloud computing and cybersecurity.

- | | | | | |
|--------------|-----------|----------------|------------------|-----------|
| • HTML/CSS | • React | • ASP.NET Core | • VirtualBox | • UX/UI |
| • Sass | • Laravel | • MySQL | • Ubuntu | • Figma |
| • Tailwind | • C# | • SQL Server | • Windows Server | • GitHub |
| • JavaScript | • PHP | • AWS (EC2) | • Kali Linux | • Postman |
| • REST APIs | • SQL | • Cypress | • Command Line | • Scrum |

EXPERIENCE

WEB SUPPORT — *COMPUTRANS S.A. COMPANY*

August 2025 - November 2025

- Monitored web hosting infrastructure and resolved technical issues related to domain access, CMS configuration, and SSL certificates.
- Investigated server logs and collaborated with the hosting provider to diagnose and resolve issues affecting website availability and security.
- Implemented website updates using SiteJetBuilder, including the development of the “About Us” page and integration of a basic chatbot for user interaction.
- Documented technical incidents and solutions to improve system stability and support future troubleshooting.
- Created UI design prototypes in Figma and developed digital assets such as logo animations and promotional videos for internal communication and social media.

FULL STACK DEVELOPER & QA — *ESCAPE PROJECT*

August 2024 - November 2024

- Developed frontend features using React, JavaScript, and Tailwind CSS to build dynamic and responsive user interfaces.
- Implemented geolocation features by integrating a map API, enabling interactive maps, real-time user location tracking, route visualization, and distance and travel time calculations.
- Implemented dynamic UI components such as category carousels, user stories, navigation menus, and map dark/light mode support.
- Collaborated on backend development using Laravel and MySQL, supporting RESTful API integration and database-driven application functionality.
- Automated end-to-end testing using Cypress to validate user flows and improve application reliability.
- Worked within an Agile development environment using Scrum, collaborating in sprint planning, development, and testing cycles.

EDUCATION

BACHELOR'S DEGREE IN INFORMATION TECHNOLOGY AND MULTIMEDIA — *University of Costa Rica* 2026 - Present

HIGH SCHOOL DIPLOMA – INFORMATION TECHNOLOGY AND MULTIMEDIA — *University of Costa Rica* 2021 - 2025

CERTIFICATIONS

AWS ACADEMY CLOUD FOUNDATIONS — *AWS Academy* 2023

INTRODUCTION TO CYBERSECURITY — *Cisco Networking Academy* 2023
